

Address

A leading company specialized in manufacturing all kinds of contact lenses

Medios

Re vay Nou Wear.

Medios is a contact lens manufacturer specialized in producing clear and cosmetic contact lenses.

We give **Beauty and Care for your Eye**

Founded in 2005, Medios is a specialized contact lens manufacturer that has been leaping every year with its technology and quality.

Our resettable customers' tender care for our products has contributed to our present success as one of the leading supplier in soft contact lenses.

In particular, the combination of Double-Wrapped Technology(DWT) and Automated Cast Moulding System in the production line provide better quality of contact lenses in global market.

Our Mission is to provide eye care professionals with contact lens products and services that enhance the lives of our customers. With ongoing research and development, Medios offers the highly market sophisticated lens designs and innovative fitting systems.

We increase revenue for our customers by satisfying and retaining partners. Connect your business to the better contact lens resources you need through Medios.

의료기기 제조 및 품질관리 기준 적합인정서 (Certificate of GMP)

<Medios has acquired a variety of certificates and remains in compliance with world standards and regulations.>

General Info.

- Capital: US\$ 5million
- Production capacity: 15 million / month

Vision 2020

- Dedicate to become a reliable supplier in soft contact lens.
- Dedicate in Integrating manufacturing, Design and R&D.

ABOUT MEDIOS LENS

Automated production system

Cast Moulding System

Automated clean and Inspection facilities

High quality and production capabilities are achieved by the production system with our state- of-the-art facilities and our clean environment.

Our manufacturing initiatives offer both high quality and strong cost competitiveness.

While ensuring high quality with the production system based on ISO 13485- the quality management system of medical device -we make efforts to optimize the process.

We design and all our manufacturing facilities are located at our factory which creates through cost reduction and strong cost competitiveness.

TECHNOLOGIES

The most reliable Soft contact Lens manufacturer

The Flexibility and Clear Vision Correction are the one of the key factors for the success in today's modern manufacturing environment and dynamic global marketplace.

Connect your business to the better contact lens resources you need through Medios.

All lenses are produced in a perfect production environment of consistent temperature, humidity, illumination, air condition and the operation of clean air-shower system in order to block any dust. Also the products are subject to extensive and stringent quality control

Strong Point of Medios Lens

Excellent design

The core technology of Medios Lens is in the design. You can feel almost like you're wearing no lenses. Wear and feel it!

*Good bye, Contact Lens Dryness!

Medios Lens is designed to minimize the contact lens dryness.

You can keep your eyes be comfortable all day long!

2Hema Color 2Hem

Medios started to set up a global distribution network.
Please grab this excellent opportunity for your

Medios Lens will give you the perfect vision correction.

Our All Automatic Production System is controlled only for your vision and eyecare.

Eyes be free with Medios!

Automated Cast Moulding System

The combination of Medios Double-Wrapped Manufacturing(DWT) and Automated Cast Moulding System in the production line provide the highest quality and enables stable mass production. It also gives a comfortable fit and prevents decolorization of the lens.

General Specification

Material	USAN	W/C	в/с	DIA	Dk	Dk/t	Usage	Design	UV block	Clear/Color
Silicon Hydrogel										
Si + Hy	-	48%	8.7	14.2	75	90	Monthly	SP	UV	Clear/Color
Phosphorylcholine + P-HEMA										
PC + P-HEMA	-	48%	8.7	14.2	16	-	Daily	SP	UV	Color
PC + P-HEMA	-	43%	8.7	14.2	12	-	Monthly	SP	UV	Color
Conventional P-HEMA										
P-HEMA	Etafilcon A	58%	8.7	14.2	10	-	Daily	SP	UV	Clear/Color
P-HEMA	-	48%	8.7	14.2	9.6	-	Daily, Monthly	SP	UV	Clear/Color
P-HEMA	Polymacon	38%	8.6	14.2	11	-	Monthly, Yearly	SP	-	Clear/Color

Blue light cut contact lens

Specification can be customized and applicable to all Hydrogel lenses.

DWT®

This method is to locate the color layers between the inside and outside layer of the contact lens so the color between the layers does not directly touch the eyes as it gives a comfortable fit and prevents decolorization of the lens also it makes the wearers much safer.

SILICONE HYDROGEL CONTACT LENS & PC LENS

Benefits of Silicone hydrogel lenses

The primary benefit of silicone hydrogel lenses is that they reduce the tradeoff between oxygen permeability and wettability. This opens up many possibilities for silicone hydrogel contacts, including; Extended wear (sometimes for up to six straight nights and days) Continuous wear (sometimes for up to thirty days before replacement) Increased comfort and performance.

The most significant of which, as we already mentioned, is the ability to let in far more oxygen than all other types of contact lenses.

Phosphorylcholine (PC) Lens

Phosphorylcholine (PC), which is the main material of color contact lenses developed by MEDIOS, is a biocompatible material with a molecular structure similar to that of the human body. It is a material that is highly safe.

The PC lens maintains a comfortable fit due to its protein adherence suppression function, and it is characterized by its ability to inhibit bacterial growth on its surface, which makes it less susceptible to bacterial infections and can be safely worn.

In addition, since moisture is retained by suppressing moisture evaporation on the surface, customers can feel comfortable for a long time.

BLUE LIGHT CUT & PHOTOCHROMIC CONTACT LENS

BLUE LIGHT CUT CONTACT LENS

Avoid long-term eye damage.

Blue-violet light is everywhere, from your smartphone, tablet, computer and even from the sun. It can put your eyes at risk of long-term damage.

Medios' clear contact lens will prevent long-term damages for your eyes by selectively filtering harmful UV and blue light.

UV light from the sun can cause cataracts, while blue light can cause AMD. By choosing Medios, you are protecting your eyes on a daily basis and maintaining your long term eye health.

Looking at digital screens all day can be very harsh on our eyes. Medios contact lenses are specially enhanced for your computer, TV and smartphone usage to keep you relaxed and protected and it helps you feel comfortable.

It will show Medios BLC lens can diminish UV and HEV light.

Light is electromagnetic radiation within a certain portion of the electromagnetic spectrum. Shorter wavelength have more energy but longer wavelength leach deeper.

PHOTOCROMIC CONTACT LENS

Darken on exposure to UV ray, in the absence of activating light the lenses return to clear state. Clear lens itself or combination effects of color lens will corrects vision and adapts to changing light conditions, protect the eyes from UV rays and cosmetic effects as well.

We have filed patents and registration with Korea, EU and other four countries for the Maufacturing Method of the Blue light cut contact lens and Photocromic contact lens.
